

Amendments To Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended): A lighting fixture, comprising:
 - a housing; and
 - a first assembly supported by the housing, wherein the first assembly comprises:
 - a lamp fixture; and
 - a lid configured to support the lamp fixture, wherein the lid is held in vertical contact with a first end of the housing by gravity alone, and wherein the lid is configured in slidable contact with the housing; and
 - a linkage assembly connected to the lid and supporting the lamp fixture, wherein the first assembly is configured to facilitate linear and both pitch and yaw rotational positioning of the lamp fixture, and wherein the first assembly is configured such that the step of removing the lid also removes the linkage assembly and the lamp fixture.
 - ~~a positioning assembly supported by the housing and positioning the lamp fixture, wherein the positioning assembly is configured to allow linear and rotational positioning of the lamp fixture.~~
2. (Currently Amended): The lighting fixture of claim 1, wherein the housing comprises a cylindrical structure, and wherein the lid is further configured to facilitate rotation of the first assembly about an axis through the radial center of the cylindrical structure.
- 3-5. (Cancelled).

6. (Currently Amended): The lighting fixture of ~~claim 5~~ claim 1, wherein the lid further comprises a window and wherein the window comprises a glass transparent covering configured to be recessed relative to a top surface of the lid of the positioning assembly, wherein the lid comprises a weep hole, and wherein the lid is configured to drain water off the surface of the ~~glass-transparent~~ covering through the weep hole.
7. (Cancelled).
8. (Currently Amended): The lighting fixture of ~~claim 4~~ claim 1, wherein the linkage assembly further comprises an elongated member defining a slotted groove, wherein the slotted groove is configured to receive a thumb-bolt assembly for slideably adjusting and fixing the distance between the lamp fixture and the lid of the positioning assembly.
9. (Currently Amended): The lighting fixture of claim 8, wherein the slotted groove and thumb-bolt assembly are further configured for rotatably adjusting and fixing the pitch of the lamp fixture relative to the lid of the positioning assembly.
10. (Currently Amended): The lighting fixture of claim 1, wherein the housing further comprises a pour collar configured to be fixably attached to a cylinder.
11. (Currently Amended): The lighting fixture of ~~claim 10~~ claim 1, wherein the housing further comprises a collar configured to be fixedly attached to a cylinder.

and wherein the collar is configured to attach to the housing-cylinder on both the outer and inner surfaces of a first end of the cylinder.

12. (Currently Amended): The lighting fixture of claim 1, wherein the housing has a second end and wherein the second end is configured to be an open end.

13-14. (Cancelled).

15. (Currently Amended): The lighting fixture of claim 1, wherein the lamp fixture further comprises:

a lamp fixture body;

a lamp; and

a reflector, wherein the reflector is configured to reflect light from the lamp and lamp, wherein the lamp fixture body is configured with a support shelf for supporting the reflector, wherein the lamp fixture body is further configured to support a filter lens, and wherein the lamp fixture body further comprises a lamp fixture cap and a lamp fixture base, and wherein the lamp fixture cap and lamp fixture base are configured to slideably connect to each other with at least one O-ring between the lamp fixture cap and lamp fixture base.

16-17. (Cancelled).

18. (Currently Amended): A lighting fixture comprising:

a housing;

a lamp fixture, wherein the lamp fixture is configured to be a low voltage lamp fixture; and

a positioning assembly, wherein the positioning assembly is configured to allow translational and both pitch and yaw rotational positioning of the lamp fixture, and wherein the positioning assembly is configured to be received by a housing, and wherein the positioning assembly is configured to allow moisture to enter the housing.

19-20. (Cancelled).

21. (Currently Amended): The lighting fixture of claim 18, wherein the positioning assembly further comprises:

a substantially planar lid configured to be supported by the housing, wherein the lid further comprises a window; and

a linkage assembly connected to the lid and supporting the lamp fixture.

22. (Cancelled).

23. (Currently Amended): The lighting fixture of claim 21-claim 22, wherein the window comprises a glass-transparent covering configured to be recessed relative to a top surface of the lid of the positioning assembly, wherein the lid comprises a weep hole, and wherein the lid is configured to drain water off the surface of the glass-transparent covering through the weep hole.

24. (Cancelled).

25. (Original): The lighting fixture of claim 21, wherein the linkage assembly further comprises an elongated member defining a slotted groove, wherein the slotted groove is configured to receive a thumb-bolt assembly for slideably adjusting and fixing the distance between the lamp fixture and the lid of the positioning assembly.

26. (Original): The lighting fixture of claim 25, wherein the slotted groove and thumb-bolt assembly are further configured for rotatably adjusting and fixing the pitch of the lamp fixture relative to the lid of the positioning assembly.

27. (Currently Amended): The lighting fixture of claim 18, wherein the housing further comprises a pour collar configured to be fixably attached to a cylinder.

28. (Currently Amended): The lighting fixture of ~~claim 27~~, claim 18, wherein the housing further comprises a collar configured to be fixably attached to a cylinder, and wherein the collar is configured to attach to the housing-cylinder on both the outer and inner surfaces of a first end of the cylinder.

29. (Currently Amended): The lighting fixture of claim 18, wherein the housing has an open end opposite the end of the housing that is configured to receive the positioning assembly.

30. (Currently Amended): The lighting fixture of claim 18, wherein the positioning assembly and lamp fixture are is-removable from the housing as a unit, and wherein the unit comprises a lid, a linkage assembly and the lamp fixture.

31. (Cancelled).

32. (Currently Amended): The lighting fixture of claim 18, wherein the lamp fixture further comprises:

a lamp fixture body;

a lamp; and

a reflector, wherein the reflector is configured to reflect light from the ~~lamp, lamp~~ and wherein the lamp fixture body is configured with a support shelf for supporting the reflector, wherein the lamp fixture body is further configured to support a filter lens, wherein the lamp fixture body further comprises a lamp fixture cap and a lamp fixture base, and wherein the lamp fixture cap and lamp fixture base are configured to slideably connect to each other with at least one O-ring between the lamp fixture cap and lamp fixture base.

33-35. (Cancelled).

36. (Currently Amended): The lighting fixture of claim 26, wherein the lamp fixture further comprises:

a lamp fixture body, wherein the lamp fixture body further comprises a lamp fixture cap and a lamp fixture base, and wherein the lamp fixture cap and lamp fixture base are configured to slideably connect to each other

with at least one O-ring between the lamp fixture cap and lamp fixture base, and
wherein the lamp fixture body further comprises at least one positioning assembly
connection point configured to receive the thumb bolt;

a lamp; and

a reflector, wherein the reflector is configured to reflect light from the
lamp and wherein the lamp fixture body is configured with a support shelf for
supporting the reflector.

37. (Currently Amended): A method for using a lighting fixture comprising the steps
of:

positioning a housing;

adjusting the elevation of a lamp fixture relative to a top surface of a
positioning assembly lid while the lid is not placed on the housing;

adjusting the pitch of the lamp fixture relative to the top surface of the
positioning assembly lid while the lid is not placed on the housing;

placing the positioning assembly onto the housing; and

adjusting the yaw of the lamp fixture relative to a vertical line
perpendicular to the top surface of the positioning assembly lid while the lid is
placed on the housing.

Amendments to the Drawings:

The attached replacement drawing sheet includes a change to Fig. 8. This replacement sheet, which only includes Fig. 8, replaces the original sheet including Fig. 8. In Figure 8, the reference number 800, which was originally provided in the upper right hand corner of that drawing figure, has been deleted.
